Note: additional options for Mac OS 8/9 are not listed

Mobile client apps

app Part of / Add-in to	Description	Mac	Win	Java	Notes / Version / Date
iPad Document Hub app WebShare	Easy secure access to server files, for online and offline use, with automated file syncing, Spotlight search, and resumable transfers.	☐ iOS			
IT Monitor Server app IT Monitor Server	Provides IT infrastructure monitoring with iPhone push notification to admins upon server overload or service failure	☐ iOS			

* These programs can be run directly from the HELIOS Applications volume on the server. For convenience, a file "alias" or "shortcut" can be saved on the client. This has the advantage that the latest version is always used.

[†]Check the HELIOS web site for currently supported versions.

HELIOS Software — Client software installation checklist

Many HELIOS solutions include plug-ins, XTensions, drivers, and other options for installation on network clients. In general, these options add additional features or performance. This list will help ensure that all relevant options are installed for each network client.

Client _____ **IP address** _____ **Location** _____

HELIOS option Part of / Add-in to	Description	Mac	Win	Java	Notes / Version / Date

Create PDF Server

HELIOS option	Description	Mac	Win	Java	Notes / Version / Date
Create PDF Server PDF HandShake / Acrobat[†]	Highly automated server-based PDF creation solution	☐	☐		

Tool Server tools

		Mac	Win	Java	
see Settings volume	Allows applications running on network clients to be automated and remotely used by the HELIOS server	☐	☐	☐	

Admin tools

		Mac	Win	Java	
HELIOS Admin*	Application for easy setup of users, groups, volumes, printers, sync jobs, hot folders, and other server settings from Windows, Mac, or UNIX/Linux clients	☐	☐		
UrlShareAccessHelper.html* WebShare	Form used to generate and test WebShare URL Share Access links	☐	☐	☐	
HELIOS Icon Collector* WebShare	Collects all Windows or Mac file icons, for WebShare File Server	☐	☐	☐	
HELIOS PDC Logon for AD/PDC authentication	HELIOS service installed on the Windows host that should act as the PDC to the HELIOS installation, to answer requests from the HELIOS authentication server		☐		
HELIOS ScriptAssistant ImageServer	GUI application that simplifies the creation of hot folder scripts for HELIOS Script Server and Tool Server	☐	☐		
HELIOS TM Image Builder EtherShare	Mac client tool to create HFS disk images of a specified size, with optional encryption, on EtherShare volumes	☐			
HELIOS TM Browser EtherShare	Mac client tool shows centralized overview of the status of all Mac client Time Machine backups saved to an EtherShare volume	☐			

Testing tools

		Mac	Win	Java	
HELIOS LanTest	Tests and measures the performance of Mac and Windows networks	☐	☐
