

## 7. Conclusions

The tested softproofing systems:

1. Eizo CG245W, HELIOS Webshare + PrintPreview UB2, FOGRA39, Just colorCommunicator 2
2. Eizo CG275W, HELIOS Webshare + PrintPreview UB2, FOGRA39, Just colorCommunicator 2
3. Eizo CG245W und X-Rite EyeOne Pro, HELIOS Webshare + PrintPreview UB2, FOGRA39, Just colorCommunicator 2

fullfill all normative requirements with respect to the FograCert Softproofing System and are therefore certified.

In light of the achieved tight colorimetical accuracy a user can be assured that printing conditions having a smaller gamut such as FOGRA46 can be equally well simulated. Anyhow differences in the paper shade simulation especially for not very white stock (e. g. newsshade) should be taken into consideration.
